ESSE MICROBIOME SKINCARE
PREBIOTICS
POSTBIOTICS
Prebiotics are substrates that are selectively utilised by host microorganisms conferring a health benefit.
Most leave-on products
A postbiotic is a preparation of inanimate microorganisms and/or their components that confers a health benefit on the host.
Lactobacillus Lysates (Level 2): Microbes are broken, and the cell contents are used.
Tyndallised Lactobacillus (Level 3): Microbes are deactivated by heat but are kept whole.
